

DANIEL MAGRO

Port St. Lucie, FL | dan@magro.dev | github.com/DanDo385 | linkedin.com/in/dmagro
Portfolio: https://magro.dev - projects, writing, Agent Mode, and infrastructure thesis

SUMMARY

13-year institutional rates and macro operator now building open source EVM infrastructure, agent-readable systems, and AI-native financial tooling. Pairs deep market fluency in liquidity, collateral, execution, and risk with hands-on engineering in Go, Solidity, EVM tooling, and agent systems.

Core expertise: Market structure, liquidity & settlement, trading & risk, DeFi mechanics, agentic systems
Building with: Go, Solidity, TypeScript, Python, Foundry, Geth, EVM tooling, Hermes, MCP, ACP

PROJECTS & OPEN SOURCE

- Rollup Mechanics Lab** github.com/DanDo385/eth-l2
- Optimistic fraud-proof and ZK validity-proof labs that make rollup mechanics inspectable.
- Portfolio Agent Mode** github.com/DanDo385/portfolio-site
- Structured agent surfaces on magro.dev: /agent.json, /llms.txt, and /agent/.
- Ethereum Transaction Lifecycle** github.com/DanDo385/eth-tx-lifecycle
- Full-stack visualizer from broadcast through mempool, MEV, builders, and finality.
- Hermes X-Ray** github.com/DanDo385/hermes-xray
- Browser observability lab for Hermes-style prompt intake, tool selection, loops, and verification.
- AMM Simulation Engine** github.com/DanDo385/eth-amm-sim
- Foundations lab for AMM economics, fixed-point math, and EVM trading simulations.

PROFESSIONAL EXPERIENCE

- Product & Web3 Platform Contributor** 03/2024 - 07/2025
RAMM.ai, New York, NY
- Owned the technical and external translation layer for an early-stage Web3 marketplace: wrote EVM smart contracts and built the product frontend and public website end to end.
 - Took the product story into the field at retail and Web3 conventions nationwide, explaining the marketplace model and on-chain value proposition to retailers, prospective partners, and users.
- Independent E-Commerce Operator (Automation & Market Analysis)** 05/2019 - 07/2022
Self-Employed
- Automated supply monitoring and execution optimization across retail platforms using Python; analyzed secondary-market liquidity, pricing, and operational risk.
 - Generated average annual profits of approximately \$100K, \$215K, and \$155K across three years through automated execution in a constrained opportunity set.
- Vice President - Fixed Income Portfolio Manager** 04/2017 - 04/2019
Prudential Financial (PGIM), Newark, NJ
- Managed global interest-rate and relative-value portfolios across U.S., Canadian, European, and Japanese markets, achieving a personal Sharpe ratio of 2.1 and contributing to outperformance of multi-billion-dollar real-money portfolios.
- Vice President - Asian Hours Macro Execution Desk** 05/2015 - 02/2017
PointState Capital, New York, NY
- Executed cross-asset fixed income, FX, equity, and derivatives trades during Asia hours as the real-time interface between portfolio managers and global trading desks.
- Vice President - Proprietary Trading** 03/2011 - 05/2015
Nomura Securities, New York, NY
- Traded global rates, FX, and equities across U.S., European, and Japanese markets, delivering positive P/L annually with a personal Sharpe ratio of 2.4 versus a desk average of approximately 1.8.
- Institutional Fixed Income Sales** 07/2006 - 02/2011
Merrill Lynch & Jefferies, New York, NY
- Covered institutional interest-rate clients within senior sales pods generating approximately \$45MM in annual production at Merrill Lynch and \$10MM at Jefferies; worked with the Federal Reserve and other regulators contributing to Jefferies' Primary Dealer designation.

EDUCATION & CERTIFICATIONS

B.S. Finance, Pennsylvania State University - Magna Cum Laude
Overall GPA: 3.73 | Major GPA: 3.93
Cyfrin Updraft | boot.dev | CS50 | MIT OpenCourseWare

COMMUNITY & INTERESTS

Volunteer assisting new citizens with documentation and English support; animal shelter volunteer; active pickleball player.
